

# Guide To TPN Products & Services

The Print Network offers a comprehensive range of communication solutions to a diverse clientele. TPN is an evolving business, constantly seeking opportunities to refine our capabilities. Interaction with a variety of dynamic organizations provides us with a prime arena for expanding and improving our unique line of services. Always striving to broaden our scope, we continue to make exciting additions to our technical offerings. TPN now offers customized Internet-based ordering as well as the technology to produce personalized variable-data documents. With the addition of a digital press, digital plates, full color equipment and an expanded, bindery department, we are now able to be even more responsive, efficient, and competitive than ever before.

With the installation of the iGen3 Digital Printing Press, The Print Network offers the most current technology and can provide unparalleled quality, flexibility, and pricing. Additionally, The Print Network has developed proprietary software solutions utilizing the Internet for custom-designed interactive purchasing, achieving unprecedented accuracy and speed. Ask your sales representative for an interactive trial, see the **Business Card Promo** area of our website [www.theprintnetwork.com](http://www.theprintnetwork.com).
